HTML-Assignment-3

1. Design a profile page by using inline, internal and external CSS.

Home.html

```
<!DOCTYPE html>
<html lang="en">
 <head>
   <meta charset="UTF-8" />
   <meta http-equiv="X-UA-Compatible" content="IE=edge" />
   <meta name="viewport" content="width=device-width, initial-scale=1.0" />
   <title>My Portfolio</title>
   <link rel="icon" href="Images/favicon.ico" type="image/x-icon" />
   <link rel="stylesheet" href="home.css" />
 </head>
 <body>
   <div class="headify">
     <b>CodeWithChinmay</b>
   </div>
   <h1 id="id1">
     <a target="_blank" href="contact.html">Contact</a>
   </h1>
   <h1 id="id2">
     <a target="_blank" href="gallery.html">Gallery</a>
   </h1>
   <h1 id="id3">
     <a target="_blank" href="blog.html">Blog</a>
   </h1>
   <h1 id="id4">
     <a target="_blank" href="projects.html">Projects</a>
   </h1>
   <h1 id="id5">
     <a target="_blank" href="aboutme.html">About</a>
   </h1>
   <h1 id="id6">
     <a href="home.html">Home</a>
   </h1>
   <img id="id11" src="Images/Boy2.png" />
```

Home.css

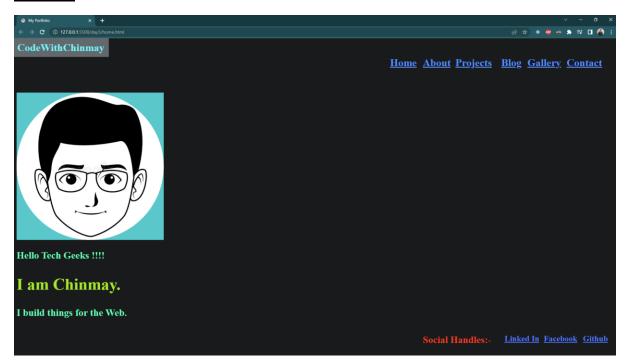

```
.headify {
  background: gray;
  padding: 10px;
  font-size: xx-large;
  color: aqua;
  position: fixed;
  top: 0;
  left: 0;
  right: 0;
  width: 270px;
}

#id1 {
  color: royalblue;
  width: 150px;
  margin-top: 30px;
  float: right;
}
```

```
#id2 {
  color: royalblue;
 width: 120px;
 margin-top: 30px;
 float: right;
#id3 {
 color: royalblue;
 width: 80px;
 margin-top: 30px;
 float: right;
#id4 {
 color: royalblue;
 width: 140px;
 margin-top: 30px;
 float: right;
#id5 {
 color: royalblue;
 width: 100px;
 margin-top: 30px;
 float: right;
#id6 {
 color: royalblue;
 width: 100px;
 margin-top: 30px;
 float: right;
img,
#id11 {
 height: 450px;
 width: 450px;
 background-color: aqua;
 margin-top: 140px;
 display: flex;
 justify-content: center;
 align-items: center;
#id7 {
 text-align: left;
```

```
font-size: 30px;
  color: rgb(1, 255, 179);
#id8 {
 text-align: left;
 font-size: 50px;
 color: rgb(145, 230, 36);
#id9 {
 text-align: left;
 font-size: 30px;
 color: rgb(1, 255, 179);
.git {
 color: Blue;
 font-size: 25px;
 width: 100px;
 float: right;
 margin-top: 1px;
.fb {
 color: Blue;
 font-size: 25px;
 width: 120px;
 float: right;
 margin-top: 1px;
.linked {
 color: Blue;
 font-size: 25px;
 width: 120px;
 float: right;
 margin-top: 1px;
.social {
 color: red;
 width: 250px;
 float: right;
 font-size: 30px;
 margin-top: 1px;
```

Output:

Aboutme.html

```
<!DOCTYPE html>
<html lang="en">
 <head>
   <meta charset="UTF-8" />
   <meta http-equiv="X-UA-Compatible" content="IE=edge" />
   <meta name="viewport" content="width=device-width, initial-scale=1.0" />
   <title>Personal Details</title>
   <link rel="icon" href="Images/favicon.ico" type="image/x-icon" />
   <link rel="stylesheet" href="about.css" />
 </head>
  <body>
   <h1>Career Objective</h1>
     Seeking a role to enhance and explore my technical knowledge gained at
the
     University of Mumbai in the last 7 years. I hold a MSc.IT degree from
     Vidyalankar College and currently I'm pursuing PG-DAC course. I intend
to
     be a part of an organization where I can constantly keep learning and
     developing my technical and management skills to make the best use of
     them.
   <h1>Education Qualifications</h1>

  </head>
  <body>
    <h1>Solar Powered IOT Based Sanitary Napkin Vending Machine:</h1>
      The work aims at installing an automatic napkin dispenser on dropping of
      coins in toilets and places with the feature of intimating the person
      concerned through notification on an application for refilling the
Napkins
     in the machine.
    The whole system will be operated with the use of solar energy.
    <img src="Images/Capture.JPG" height="200" width="400" />
    <h1>Detecting Phishing Websites Using Machine Learning:</h1>
     The work aims to create a platform for the users to identify whether a
     website is a legitimate or not and report if it is a malicious one.
    User can also add phishing website URL or fake website URL into system
     where system could access and scan the phishing website and by using
     machine learning algorithm, it will add new suspicious keywords to
     database.
    <img src="Images/Capture3.JPG" height="200" width="400" /><br />

```

Output:

Blog.html

```
</head>
  <body>
    <h1>My First Blog</h1>
      "The Future of the Web - Reinstalling the Big Missing Feature of the
Web"
    </h2>
      The California Software Professional Association (www.cspa.com) hosted
us
      to speak on the Future of the Web. We've been discussing how the lack of
      annotations is making the web static. This has made internet platforms
     treat people and information as commodities. But do we accept a future
     where we are working for technology rather than the other way around? A
      better future of the web is possible. With The Overweb, we are building
      the next level of the web - a trust layer over the webpage, enabling
      people to have layers of knowledge and interactions on web pages. The
      first Overweb applications were Mosaic and Netscape (beta) in 1993-1995
as
     well as modern annotation pioneers Hypothesis, Diigo, and Rap Genius.
     The emergent Overweb is anchored by an open-source blockchain called the
     Overchain that enables:
    a) participants to own and control their annotation data and
      b) decentralized applications to serve interactions over the web page.
    Both of which feed AI on the edge that exposes misinformation and
      catalyzes collaboration on regenerative solutions for the world's
greatest
      problems. RSA Fellows Daveed Benjamin and Joshua Armah presented the
     unknown history of web annotation, the case for The Overweb, The Overweb
      pattern, and the open-source blockchain-based tools they are developing.
